

NEOTAP

Specifications

1. Overview

The Neotap is a peripheral device dedicated to the *Neo Geo Advanced Entertainment System*. The aim of the Neotap is to connect 4 sticks simultaneously to the game console

2. Connection

The Neotap connects to the Neo Geo through the 2 D-Sub15 connectors on the front of the game console. Then the Neotap shows 4 new D-Sub15 connectors.

3. Software compatibility

The Neotap has been designed first to work with the game Neotris. Free of any anti-piracy system, the Neotap could work with any game to be released in the future if implementing the appropriate source code.

The Neotap doesn't guarantee compatibility with the Neo Geo games prior to 2020.

4. Hardware compatibility

The Neotap works with the *Neo Geo Advanced Entertainment System*. The Neotap is also compatible with the *Neo Geo Multi Video System* equipped natively with 2 D-Sub15 connectors. The Neotap doesn't work properly when connected through JAMMA.

The Neotap is compatible with sticks *Neo Geo Arcade* and *Neo Geo CD Controller Pro*.

stick Neo Geo Arcade

Neo Geo CD Controller Pro

The Neotap doesn't guarantee compatibility with the gamepad *Neo Geo CD Controller*. The Neotap doesn't guarantee compatibility with third-party peripheral devices.

5. 2P and 4P modes

The Neotap has a 2 positions switch allowing to choose between the 2P mode dedicated to original Neo Geo games and the 4P mode dedicated to games handling up to 4 sticks.
